What is Airee Cloud?

Speedup

Airee Cloud solves 95% of website performance issues for any devices. Average website speedup is 2.5x

Content Delivery

Large Airee POPs network provides fast and perfect delivery any type of content: images, scripts, video

Availability

Airee guarantees 99.99% website availability when your hosting or provides fails

Optimization

Airee Cloud incorporates best industry standards: PCI-DSS, HTTP/2, CDN, FEO, SSL/TLS

Best Price

Airee is aimed to provide content delivery and website optimization from $5/day
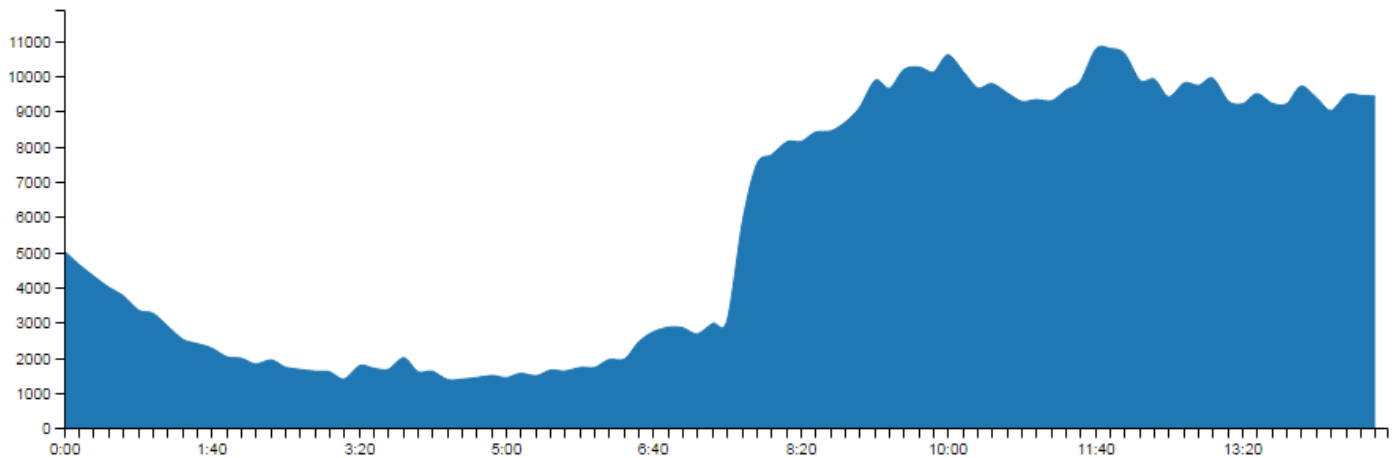

Support 24x7

Airee support solves all issues with website load speed in-time

Maximum Website Performance

With the help of CDN and smart caching Airee Cloud allows you to shrink your hosting load up to 98%, improve speedup website indexing with search engines and guarantee fail tolerance under high load.

Overall Traffic, Mb   ● daily ○ monthly ○ quartely

High Load Stability

Your website will work even under high load, origin shield included

Rapid Indexing

Search engines get all website pages and deep content

100% Availability

Any external monitoring will show full website availability

Website Speedup

With Airee Cloud website load metrics become 2-3 times better, **Google Page Speed grade reaches 80-90.** Airee provides website load speed RUM statistics and detailed information about slow pages.

Website Load Time, ms   ● daily ○ monthly ○ quartely

■ Redirect ■ DNS ■ Connect ■ SSL ■ Server ■ Download ■ DOM ready ■ Onload

Server Caching

Caching rules for pages and files, docs and assets, auto-reload, API

Files Compression

Maximum website resources optimization without any quality losses

Mobile Optimization
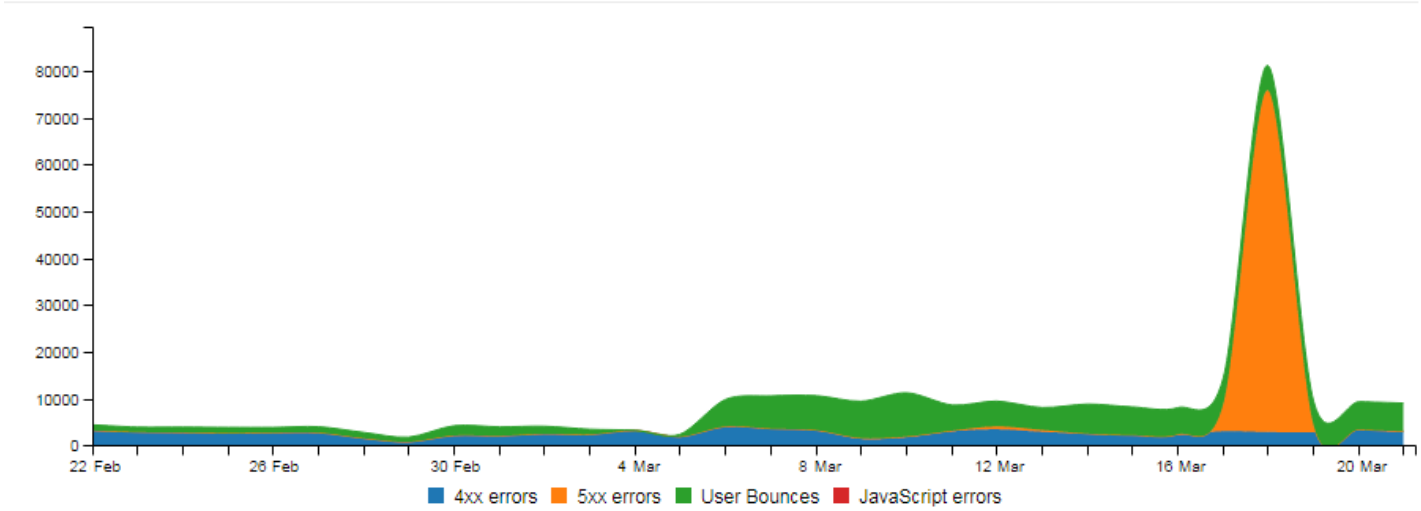

Additional optimization for cellular networks and weak CPUs

Website High Availability

Airee Cloud checks website hosting status and gives overall statistics for day, month and quarter. Your website continues to work even if hosting fails (if 100% availability is set). Airee Cloud also increases website availability with 'open eyes' and 'no errors' tecnologies.

Website Errors

○ daily ● monthly ○ quartely

4xx errors   5xx errors   User Bounces   JavaScript errors

Server Errors

Airee can instantly check you hosting for errors

Notifications

In case of any errors you will get e-mail and sms

Website Diagnostics
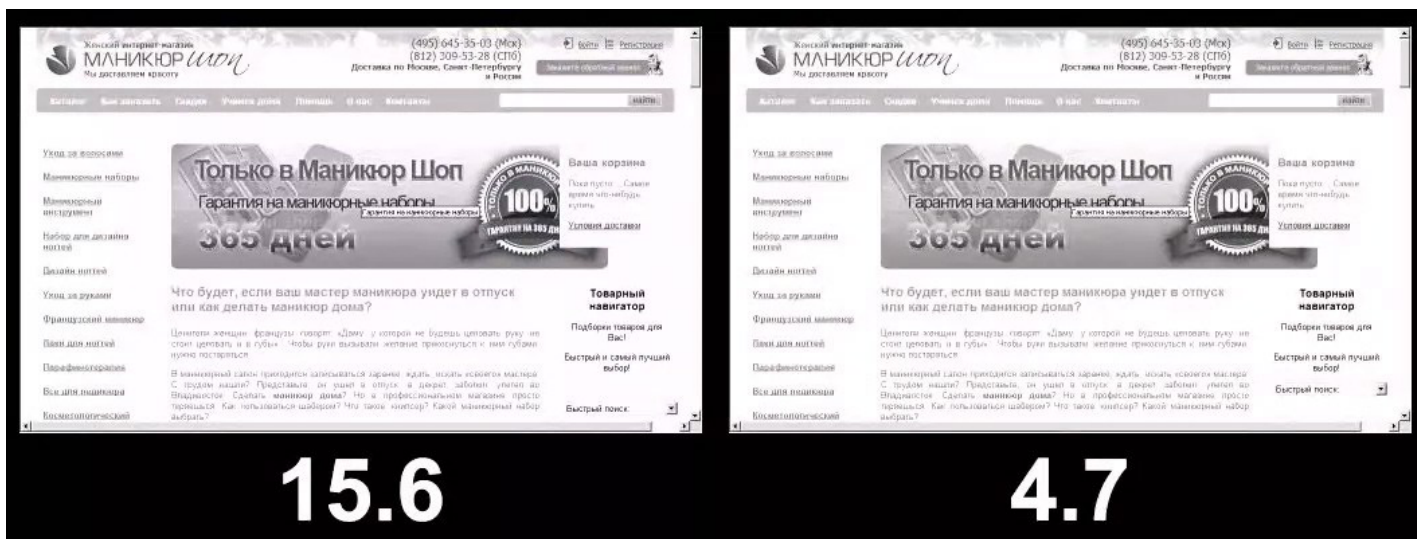

Website status can be checked in My Account at any time

Our Clients Speaking

Accelerating the website with Airee Cloud in a situation where the website should work every day and without failures (like our portal) is an ideal solution to solve all issues with load speed quickly.

cs-garant

Just wonderful. We really appreciate your attitude. We will always you and all advertise as a company with a

really excellent support service. The website really began to load significantly faster.

vorotnet
On a fast website users were up to 40% more likely to fulfill their goals and buy products. Customers stay longer on the site, which in turn increases the likelihood of buying.

cdn.gifts

We are grateful to the Airee company for the fact that when our server was attacked by cybercriminals, Airee Cloud completely resolved the issue with the availability of our website. And they also consulted on all issues. In general, I recommend!

alcomag
In Airee Cloud websites are under reliable protection. Thank you for your professional help and solution!

ruskline
Airee solves two extremely important problems for us: ensures the stability and speed of our projects and distributes a large amount of data to external customers without increasing server capacity.

stripmag

Airee really works! Very useful server for all websites! I do not understand why so few people use such opportunities.

metallographic-microscopes
It's very difficult and long to find partners which are true professionals! It is doubly pleasant when it is possible to find them in WEBO Group and Airee Cloud companies.

par
For the first time in the last year and a half, the position of the site for the region of Europe (I have a collection through SEOLIB) CUT UP!
